4.2

View results, start & stop polls on mobile

View Live Results

Press the NAME of the poll to see results. You can view results for Currently Running polls or polls that have ended which will appear in the Previous Polls Section.

End a Poll

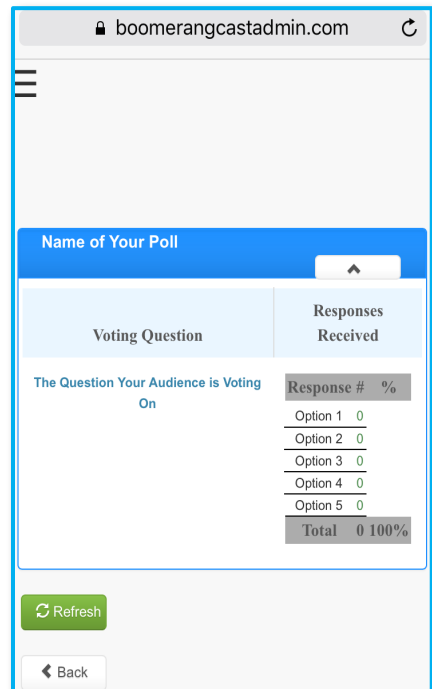

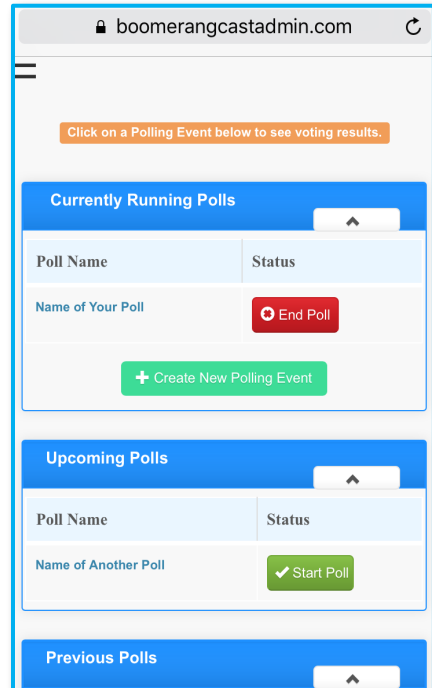

Press the End Poll button to end a Live Poll. Note: once you have ended a poll, you cannot restart it.

Start a Poll

To Start an Upcoming poll, simply press the Start Poll button.

Refresh Live Results

Press the REFRESH button to refresh results live

4.3

Create On-Demand Polls in Advance

Follow these steps if you would like to **START** and **STOP** your poll on-demand during a live event.

BEFORE YOUR EVENT

STEP 1 Create your poll using a laptop or desktop at www.boomerangcastadmin.com

STEP 2

*** IMPORTANT *** - Schedule your poll to **START & END AFTER** your event. You want the poll to appear as an **Upcoming Poll** until you manually start it during your event. Ex: if your event is from 2-4pm, schedule your poll to **START** at 6pm and **END** at 7pm in the Boomerangcastadmin.com site.

DURING YOUR EVENT

STEP 3 Use a mobile **"BROWSER"** and login to www.boomerangcastadmin.com

Safari, Chrome, Explorer, etc. Login with your boomerangcastadmin.com username and password

STEP 4 Start the Poll by pressing "Start Poll"

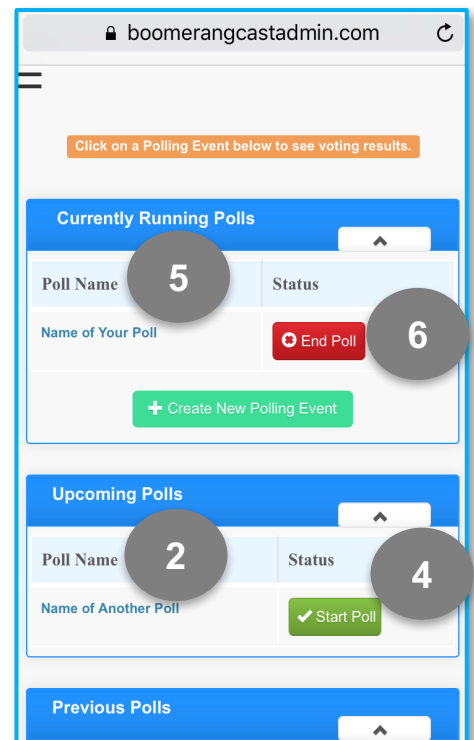

Once you start the poll, it will appear in the BOOMERANGCAST mobile app for people to see and vote. Depending on your phone's browser, you may need to press the "reload" button on your phone's browser for the browser to correctly show the poll in the Currently Running Polls section.

STEP 5 View Results by pressing the Poll Name

Press the poll name to view results for Currently Running or Previous Polls which have ended.

STEP 6 End the Poll by pressing "End Poll"

Once you End the poll, you cannot restart it. After Ending the poll, the poll will move down to the "Previous Polls" section. Once the poll has Ended, voters will no longer see the poll in their app nor will they be allowed to vote anymore.

EDITING an Upcoming Poll

To **EDIT** the poll through a mobile browser (add/change voting options, questions, etc), make sure the poll has not started yet. Click on the name of the poll in the "Upcoming Polls" section to **EDIT**
